The Hotbox is designed to update members, volunteers, and the general public about activities, work events, and volunteer opportunities at the museum. Questions or comments can be directed to the Assistant Editor at: info@spcrr.org.

The Museum’s mission is the preservation, restoration, and interpretation of regional narrow gauge railroad history, including Carter Brothers—a pioneer railroad car builder in California. The Railroad Museum at Ardenwood is located at Ardenwood Historic Farm, 34600 Ardenwood Blvd., Fremont, California.

A special holiday dinner and presentation for all our members and volunteers

The annual Holiday Dinner (provided by Dino’s), General Meeting/Election of Officers, with a program by special guest, Michael Campbell, will be held on Saturday, December 2 at 6:00 p.m. in the Granary at Ardenwood Historic Farm.

This year we were very fortunate to get Michael Campbell, President Emeritus of the Carolwood Pacific Historical Society, to host a multimedia presentation titled “A Railroad Runs Through It: The Life and Lessons of Walter Elias Disney.” Michael explores how Walt Disney’s love of railroading influenced his personal life, his work and the world as we know it. Learn about the miniature railroad that the Disneys had at their Holmby Hills residence, the trains that operate on the Disneyland Railroad, and more! Michael will also share behind-the-scenes stories and pictures from the creation of the Walt Disney Family Museum in San Francisco.

If you need directions to Ardenwood’s Granary, please send an email to the address below or call and we will send you a map.

It is very important that you RSVP so we can order a dinner for you.

Target cars for Redwood For Restoration Fund

South Pacific Coast caboose 47. First car acquired by the Museum. Built as part of a series of four caboose cars in the summer of 1882 by Carter Brothers in Newark for the South Pacific Coast Railroad. Long considered the flagship of our collection, SPC 47 is now undergoing a study phase, in which detailed research and background information is developed before beginning restoration work.

South Pacific Coast box car 444. One of three sister cars, 444 (along with 472 & SP 10) was built by Carter Bros. in 1880 for the Oregonian Railway. The three cars were built to the same basic dimensions, but 444 was a unique double-door box car, equipped with both solid side doors, and ventilator side doors. From a common birth, our three 1880 Carter box cars will be restored to reflect the differences that use and time brought to their unusually long life spans.

Monterey & Salinas Valley boxcar. The oldest known Carter Brothers car, this ancient boxcar was built in Monterey in 1874, part of a fleet of eight boxcars constructed for the fledgling Monterey & Salinas Valley Railroad. Rated at just 8 tons capacity, a modern flatbed truck can haul more payload. But this car, perhaps the oldest narrow gauge boxcar in America, helped launch the narrow gauge movement in California and helped establish Carter Brothers as a player in the West Coast railroad supply business.
Donations

We Now Have a Tractor!

At the May 2017 Board meeting, Andy Cary and John Stutz presented a summary of options for replacing our tired weed mower. The prices were all in the range of $2,000. The discussion evolved into other options such as the purchase of a used front-end loader tractor, when Board member Gary Smith offered a $5,000 donation toward the purchase of a tractor. With a power take off, spreader box and mower attachment, such a tractor would be capable of mowing, dumping ballast, grading roadbed, etc. The Board agreed and Brook Rother and David Waterman were tasked with finding one that fit our needs and pocketbook.

They quickly discovered that tractors listed on Craigslist disappear quickly! After a few tries, they were successful and Brook was able to get a great used Case 480LL tractor with low hours which will more than meet our needs.

Trade for #4 Track Frogs and Donation of a Track Maintenance Push Car

In August, the Board approved the trade of Katie’s old gas engine (after the new diesel engine has been installed) for a pair of #4 track frogs. The frogs will be used in the storage yard. John Goldie arranged this trade and delivered the frogs to Ardenwood on September 1st. It was 115 degrees at the pick up point, and 110 at the park when he arrived. John also obtained a push car that he has donated to the Museum for track work. Thank you John for arranging this trade and for the pickup and delivery; and also for the donation of the push car!

More welcome additions to our Museum

After setting up and taking down the SPCRR Children’s Activities for three days at Rail Fair this year, Woody Ballard donated his customized hand truck to us. This will make set-up and take-down easier for us in the future, but it’s doubtful that any one of us will ever be able to operate the hand truck as efficiently as Woody.

David Waterman was not only our Engineer for all six nights of Haunted Railroad this year, he also donated a small sail boat to the event. On nights when we didn’t have volunteers to be pirates, the boat was filled with skeletons dressed as pirates. Argh!

In October, five-year-old Eleanor MacGregor took her grandfather, Bruce MacGregor, to see 4449 in Portland. While there, Bruce found a copy of the The Railroad Car Builder’s Dictionary 1879 which he has donated to our Museum collection.
For six nights in October, 3,250 visitors went where thousands of visitors have gone before—into the Haunted Woods at Ardenwood. All trains were sold out! THANK YOU to everyone who made the Haunted Railroad a huge success! See some of our volunteers in action on pages 5 through 6.

The Village and Displays in the Haunted Woods were created and maintained this year by Andy Cary and John Stutz with help from Scott Ekstrom, Tony Peters, Stuart Guedon, Colin Taylor, Ken Underhill, David Waterman, Jack Burgess and J. Burgess. A detailed account of their amazing accomplishment is outlined under the Weekly Work Days section on pages 9 and 10.

Working in the ticket window during the first weekend of the Haunted Railroad was both fun and rewarding. I have a few good stories to tell . . .

Entitled to free tickets?
A man came to the ticket window and told me that he felt that he was entitled to some free tickets to the Haunted Railroad. His explanation: he came to the Park the previous weekend since he saw the Haunted Railroad sign on the fence near the gate and thought that tickets were for sale that evening (they are only available when we operate the Haunted RR). But when he left, he found that the front gate was locked and he had to call the park police to let him out. I told him that advertising for Park events always goes up before the actual day of an event and that I was sorry that he got locked in, but I couldn’t give him free tickets for his misfortune. I didn’t ask him why he was in the Park so late that the gates were locked when he tried to leave. During the month of October, the gate does not get locked until after 7 pm when the Perry Farm’s pumpkin patch closes and Perry’s employees leave. Maybe I should have suggested that he ask them for a free pumpkin!

Which side to sit on
Another evening I was walking back to the ticket window when a couple of men realized that I was a train volunteer and asked me to settle a wager they were having. They were discussing which side of the railroad car they should sit on to get the best view of the Witch of Ardenwood. Keep in mind that in the past, the Witch has been on the north side of the tracks in the forest. One gentleman was arguing that they needed to sit on the north side of the car since the Witch was on the north side. The other was trying to make him understand that they needed to sit on the south side of the car since the train went through two curves which meant that the sides would be reversed by the time the train entered the woods. Unfortunately, I had to tell the first gentleman that his friend was correct that the south side of the car became the north side of the car once the train entered the woods. But I also had to tell the second gentlemen that while he was correct for last year, we moved the Witch to the other side of the tracks this year! So neither one was correct!

Karma
One evening a woman paid for some Ghost Chasers (glow sticks) with a $5 bill, but then insisted that she had paid with a $20 bill. Kathy and her friend Judy at the Glow Stick table argued that the woman was mistaken, but in order to end the confrontation they reluctantly give her $15 in change. I heard about the issue but was able to share a “Karma” story with them the next day. Probably an hour after this incident occurred, a woman walking past the ticket window picked up a folded $20 bill laying right on the ground. She turned and asked me if I knew who might have dropped it. I told her that I didn’t, but that since we are a nonprofit I would be happy to put it in the cash box. She happily handed it to me. Karma?

A Feel-Good Story
By Sunday night, the number of tickets still available for that evening (as well as the following weekend) was in very short supply. A woman came to the ticket window asking for two tickets but we didn’t have any. As she sadly stepped away, another woman stepped up to redeem her Eventbrite online tickets and mentioned that she had purchased six tickets for the train ride but only needed four. Fortunately, the woman who needed just two tickets overheard her and asked if she could purchase them. Instead, the woman refused any payment and simply gave the woman the extra tickets. An hour later, I happened to see the woman who received the tickets walking past the ticket window and I asked her about her train ride. She yelled out “It was great and we have a new friend!”
A special invitation for all SPCRR members, volunteers and friends...

Report on October 2017 Board Meeting

Jack Burgess, SubstituteSecretary

WP refrigerator car – The President of the Northern Nevada Railroad Museum has indicated that they don’t currently have the funds to move this car since the cost to pick up the car with a crane is estimated at $8,000. An option suggested at the meeting is for our group to crib it up for their trailer for a donation of $5,000 from NNRM.

Katie engine replacement – President Stutz was authorized to sign a contract with Brooks Locomotive Works to install our new diesel engine in Katie during the upcoming off-season.

Buda hand car – President Stutz was authorized to sign this agreement with George Thagard and Bruce MacGregor for the use and preservation of the Buda hand car.

Cargo Container – This purchase was postponed to provide time to hopefully get the WP refrigerator car out of the Corp. Yard.

Operational Changes – The Board discussed several potential issues about our current operations including the use of historic vs. non-historic rolling stock, ground loading vs. the use of platforms for loading, and track improvements. These discussions will continue at future Board meetings.
Weekly Workdays
Track, Restoration & General Maintenance

Ken Underhill
